

INNOVATEX CONSULTING — BUSINESS TRANSFORMATION PROPOSAL

Executive Summary

We offer a flexible digital transformation platform with modern cloud services and strong business alignment.

Technical Capability

Cloud architecture, REST integration, managed database, analytics and secure identity services are proposed. Architecture can scale based on demand.

Implementation Plan

A 20-week plan covers discovery, design, implementation, testing, training and phased rollout. Scrum ceremonies and a detailed roadmap are included.

Commercial Value

Estimated cost \$155,000 with a blended pricing model. Optional managed services are available. ROI is projected from process automation.

Security & Compliance

Identity and access management, encryption, privacy controls, audit trails and security testing are included. Compliance mapping will be performed during design.

Support & Experience

Seven years of consulting experience, business analyst support, helpdesk and 8x5 standard support with P1 escalation. Three relevant client references are available.
