

SECURESTACK TECHNOLOGIES — ENTERPRISE RFP RESPONSE

Executive Summary

Our proposal focuses on secure, compliant and resilient enterprise delivery.

Technical Capability

Zero-trust architecture, API gateway, container platform, event-driven integration, managed database and multi-region deployment are proposed.

Implementation Plan

A 18-week implementation includes discovery, threat modelling, architecture, iterative development, penetration testing, UAT and controlled go-live.

Commercial Value

Total proposed investment is \$205,000. Pricing includes security testing, disaster recovery setup and 12 months of platform support.

Security & Compliance

Strong security focus with ISO 27001 practices, GDPR privacy controls, encryption, IAM, SIEM integration, audit logs, penetration testing and disaster recovery.

Support & Experience

12 years of enterprise experience. 24x7 support, 99.99% target uptime, formal SLA, incident management and quarterly service reviews are included.
